Merek Soriano

Ithaca, NY | mks258@cornell.edu | (346) 305-0555 | linkedin.com/in/merek-soriano-0ba570291

EDUCATION

Cornell University, College of Engineering, Ithaca, NY Expected Dec 2027
Master of Engineering, Data Analytics - Spring 2027 to December 2027
Bachelor of Science, Operations Research and Information Engineering; Minor in Artificial Intelligence - May 2027
Relevant Coursework: Optimization, Machine Learning, and Applications of Data Science

WORK EXPERIENCE

American Electric Power, *Columbus, OH* Jun 2026 - Aug 2026
Business Process Improvement and AI Intern
- Built internal tools for AI automation, a Python library and repeatable scripts, as one of a limited group granted early API access; adopted by other projects and projected to save multiple full-time employees of labor.
- Architected AI and document intelligence products, including a RAG system to parse enterprise documents and surface process improvement opportunities across AEP operating companies.
- Directed a robotics-initiative feasibility study for a Vice President-level executive driving enterprise-wide robotics strategy, integrating industry research and subject matter expert input; defined and tracked viability metrics.

Secretariat International, *El Segundo, CA* Jun 2025 - Aug 2025
Construction Delay Consulting Intern
- Conducted critical path and delay analysis across 4 multi-million-dollar construction projects using Primavera P6, analyzing complex data sets to quantify timeline impacts and support data-informed settlement valuations.
- Built data engineering workflows to extract and integrate complex project data from multiple sources, building analytical frameworks to support expert testimony and mediation proceedings.

Student Agencies, *Ithaca, NY* Feb 2024 - Aug 2024
Operations Manager
- Designed and launched a Salesforce-based billing and logistics platform serving 1,000+ customers across two warehouses, gathering requirements and engineering automated workflows to streamline operations.
- Led cross-functional operations for 80+ staff, scaling revenue to $375K annually with 10% YoY growth.
- Implemented algorithmic route optimization and scheduling, achieving 100% on-time delivery performance across 10+ concurrent relocation projects.

LEADERSHIP EXPERIENCE & ACTIVITIES

Cornell Generative AI Club, *Ithaca, NY* Feb 2025 - Present
Founding Head of Corporate Partnerships
- Led AI-driven product and design projects with partners including Cisco, Investcorp, and fintech startups, focusing on user-centered development and measurable outcomes from client discovery to deployment.

PROJECTS

Route Optimization Engine May 2026 - Present
Dynamic scheduling and routing system (Next.js, FastAPI, Python, OR-Tools, PostgreSQL) in development for a $300M+ roofing and exterior-repair contractor that dispatches field crews to 70-90 daily jobs; async solver with a dispatcher approval workflow projected to reduce operational costs by 20%.

ALICE (Authenticated Local Identity and Cyber Enforcement) Sep 2026
Best Design winner, DN Hacks; hardware prototype built 0 to 1 overnight. Edge system (Raspberry Pi, ESP32, Python, TypeScript, React/Tauri, SQLite) governing autonomous AI agent actions when connectivity is lost; on-device anomaly scoring holds risky actions for a face-verified technician, with a signed, hash-chained ledger.

AI-Driven CRM Migration Platform May 2026 - Completed
Full-stack multi-agent LLM platform (Next.js, TypeScript, FastAPI, LangGraph, PostgreSQL, Docker) orchestrating agentic workflows to automate end-to-end CRM data migration (Salesforce, HubSpot), with LLM-backed and fallback execution paths; verified across production CRMs with 500+ row migrations.

SKILLS & INTERESTS

Strategic & Analytical: Optimization, Process Improvement, Problem-Solving, Cross-Functional Leadership
Technical: Python (pandas, NumPy, scikit-learn), TypeScript, SQL, Full-Stack (React, Next.js, FastAPI)
Infrastructure: DevOps (Docker, GitHub Actions CI/CD), Vercel/Render, Frontier LLM APIs, Agent Orchestration
Interests: Applied AI in Operations, Off-Grid Hiking, Snowboarding, Basketball
