Merek Soriano

Ithaca, NY | mks258@cornell.edu | (346) 305-0555 | linkedin.com/in/merek-soriano-0ba570291

EDUCATION

Cornell University, College of Engineering, Ithaca, NY Expected Dec 2027
Master of Engineering, Applied Information and Technology - Anticipated December 2027
Bachelor of Science, Operations Research and Information Engineering; Minor in Artificial Intelligence - May 2027
Cumulative GPA: 3.4/4.0 | Relevant Coursework: Optimization, Machine Learning, and Applications of Data Science

WORK EXPERIENCE

American Electric Power, *Columbus, OH* Jun 2026 - Aug 2026
Business Process Improvement and AI Intern
- Architected AI and document intelligence products, including a RAG system to parse enterprise documents and surface process improvement opportunities across AEP operating companies.
- Directed a robotics-initiative feasibility study for a Vice President-level executive driving enterprise-wide robotics strategy, integrating industry research and subject matter expert input; defined and tracked viability metrics.
- Engineered a Python library and repeatable scripts for in-house AI automations as one of a limited group granted early API access; now used in other projects and projected to save multiple full-time employees of labor.

Secretariat International, *El Segundo, CA* Jun 2025 - Aug 2025
Construction Delay Consulting Intern
- Conducted critical path and delay analysis across 4 multi-million-dollar construction projects using Primavera P6, analyzing complex data sets to quantify timeline impacts and support data-informed settlement valuations.
- Developed data extraction and integration workflows to consolidate complex project data from multiple sources, building analytical frameworks to support expert testimony and mediation proceedings.

Student Agencies, *Ithaca, NY* Feb 2024 - Aug 2024
Operations Manager
- Designed and launched a Salesforce-based billing and logistics platform serving 1,000+ customers across two warehouses, gathering requirements and engineering automated workflows to streamline operations.
- Oversaw cross-functional operations for 80+ employees, scaling revenue to $375K annually with 10% YoY growth.
- Implemented algorithmic route optimization and scheduling, achieving 100% on-time delivery performance across 10+ concurrent relocation projects.

MAC Power Washing, *The Woodlands, TX* May 2023 - Aug 2023
Co-Founder
- Co-founded and scaled a power washing venture, managing pricing, forecasting, and customer acquisition.
- Grew the business to 32 clients and $6K+ revenue within 3 months.

LEADERSHIP EXPERIENCE & ACTIVITIES

Cornell Generative AI Club, *Ithaca, NY* Feb 2025 - Present
Founding Head of Corporate Partnerships
- Led AI-driven product and design projects with partners including Cisco, Investcorp, and fintech startups, focusing on user-centered development and measurable outcomes from client discovery to deployment.

PROJECTS

ALICE (Authenticated Local Identity and Cyber Enforcement) Sep 2026
Best Design winner, DN Hacks (Energy and Infrastructure track, Washington, DC). Edge system (Raspberry Pi, ESP32, Python, FastAPI, React/Tauri, SQLite) governing autonomous AI agent actions when connectivity is lost; on-device ML classification routes risky actions to a biometrically verified technician, with a signed, hash-chained evidence ledger.

AI-Driven CRM Migration Platform May 2026 - Completed
Multi-agent LLM platform (Next.js, FastAPI, LangGraph, OpenAI, PostgreSQL, Docker) orchestrating autonomous agent workflows to automate end-to-end CRM data migration (Salesforce, HubSpot), with LLM-backed and fallback execution paths; verified across production CRMs with 500+ row migrations.

SKILLS & INTERESTS

Strategic & Analytical: Lean Six Sigma, Data-Driven Decisions, Cross-Functional Leadership, Communication
Technical: Python, SQL, Salesforce, LLM APIs (Claude, OpenAI), Agent Orchestration, RAG Systems, PostgreSQL
Interests: AI in Finance, Off-Grid Hiking, Snowboarding, Basketball
